

ABOUT US

Forward-Thinking.
Architectural Design Studio.

We're committed to ensuring that large-scale mixed-use developments reflect local values, and our urban design surpasses transportation policy and planning, architectural design, economic development, engineering, and landscape considerations. Drawing inspiration from these and other elements, we create a vision for an area and then deploy the necessary resources and knowledge to bring that vision to reality, connecting people, places, movement, urban form, and nature.

CARLOS TOVAR, RA, AIA, NCARB FOUNDER

After many years of working for national and international architectural and engineering design firms, Carlos founded Diseño Urbano Studio in response to the need to preserve and enhance our human environment. This is achieved by adopting a holistic approach that involves the owner, design team, builders, community, and environment in the development of successful projects. Carlos defines Diseño Urbano (Urban Design) as the driving force that integrates various decisions such as environmental stewardship, social equity, and economic viability to create places with unique beauty and identity.
